Note:

Timer Digest measures our performance only against the Benchmark S&P 500, long and short, to arrive at a *relative performance*. Take into account that the S&P is *most crowded trade* on the planet - where there the profit pie is sliced into minute profit slivers. With the identical signals, we earn much higher returns in **TVIX/XIV** the S&P's volatility index.

Our consistent #1 performance for 3, 6, & 12 months confirms **New Wave Elliott™** as the leading-edge tool for market analysis, timing and windfall profits. In Bear Markets, *skill* is especially pertinent since most ships sink with the outgoing Market tide. In other words, our 12-month appreciation of **29.76%** is **260%** the S&P's 11.46% return. We provide these identical signals and update them daily on our free **Public Stockcharts**. You may want to add it to your *favorites*.
