NOTE: A regular feature of TIMER DIGEST is a report of the current opinion of various forecasters and an analysis of how accurate their forecasts have been over the most recent 52-week period (104 weeks for Long Term Timers). In every instance, we have tried to be as fair as possible in the comparisons, although reliability of the information given cannot be guaranteed. Because of mail delays, it is possible that the current opinion may have changed before press time.

While all the services rated provide buy and sell signals, some do not recommend short selling. However, for purposes of illustration only, the Performance Index takes into account the gain and loss on sell signals as well as buy signals. Some of these forecasts are designed to identify short term market moves while others are long term in nature. The Index measures the efficiency of the services over a 52-week period in the same manner for all. The Long Term Timers are measured over 104 weeks using their Long

Term models.

The Performance Index is calculated by considering each advisor and the S&P 500 Index to be equal to 100.00 at the beginning of the period. Timing signals assume either long or short positions in the S&P 500. This study is hypothetical and is for the purpose of comparison only. Past results are not an indication of future results. For more information call or write: TIMER DIGEST, P.O. Box 1688, Greenwich, CT. 06836 -1688 (203) 629-3583
